

16th March 2020

Dear Customer,

This note is an update on the Dovea Genetics response to the ongoing COVID-19 crisis. We wish to reassure our customers our business is open and fully operational as we move towards the breeding season.

We have issued a procedure for visiting farms to all our field team (Sales, A.I. & Liquid Nitrogen). We have requested our sales team to contact with farmers prior to visiting farms. However, in relation to AI & Liquid nitrogen deliveries farm visits will be necessary.

We would appreciate if you or a family member has contracted or is suspected to have COVID-19 please contact your local Dovea Genetics representative or call Dovea Genetics on 0504-21755 or email gryan@doveagenetics.ie

Thank you for your support in these challenging times.
