DoveaGENETICS

Maximizing Your Herd's Genetic Potential

INTRODUCTION

Welcome to our first ever Dovea Genetics Coloureds Dairy Directory. The increasing demand for the different coloured breeds has resulted in our first ever coloured breed's directory. The directory contains a wide range of dairy sires in our directory to suit your farming system. The directory contains a wide and diverse range of daughter proven and genomic sires across the breeds. To ensure that the correct bull is used for your farming system please speak to our Area Representatives or our A.I Technicians.

There is an increased range of Fleckvieh semen from GGI Spermex who have a large testing programme in Germany for the breed. The best of the breed are included here with different bulls for different systems. There are truly exceptional Montbeliarde bulls to suit all farming systems with many of the top bulls also available as sexed semen. In addition to the Fleckvieh & Montbeliarde we have semen from MRI, Rotbunt, Dairy Shorthorn, Normande & Brown Swiss breeds.

We hope you enjoy browsing through our Coloured Breeds Directory.

GERMAN FLECKVIEH

The all round - dual purpose breed suitable for barn-based and grazing systems

Milk & Beef & Fitness

If you want to

- Produce high yields of milk solids
- Increase the beef merit of your herd
- Achieve greater calf sales revenue
- Improve the health & fitness of your herd
- Breed a long-lasting herd of cows with high lifetime production

Fleckvieh from Germany is a good choice!

Germany has the biggest Fleckvieh population worldwide

1.1 mio. Cows
879,896 cows take part in milk control
743,702 cows registered in herd book

Average milk production of the Fleckvieh cows in Germany:

	No. cows	Milk kg	Butterfat %	Butterfat kg	Protein %	Protein kg
Milk recording cows	879,896	7,872	4.15	327	3.53	278
Cows reg. in herdbook	743,702	8,047	4.14	333	3.53	284
